

Introducing.....

A Clear Alternative's Emergency Response Incident Support Trailer

When a water crisis occurs, you need supplies and you need them immediately!

Our temporary onsite water treatment trailer includes, but is not limited to:

- 1. Filtration mineral tanks that utilize one or more medias to accomplish your required water quality. The number of tanks is dependent on your gpm as well as your water quality.**
- 2. Media types available are GAC carbon, greensand 1 and greensand plus, multimedia garnet, water softening as well as deionization.**
- 3. Chemical injection available pre- and post-filtration depending upon requirement of customer.**
- 4. All units are metered as to maximize efficiency of filtration.**
- 5. Additional meter on outlet side of final unit as a finished product total.**
- 6. Test ports are located after each unit to offer maximum efficiency.**
- 7. Trailers are heated utilizing onboard 220 volt heater. Onboard generator available for short term (24 hours or less). Customer is to supply power to trailer for long term rental.**
- 8. Everything that comes in contact with water is either NSF, FDA approved, or Stainless Steel material for plumbing.**
- 9. Certified Technician available 24/7 for any questions or problems during rental.**
- 10. Incidental supplies such as chlorine or salt will be billed on a monthly basis according to usage.**
